CLAIMS

What is claimed is:

1 A method for creating a presentation, comprising the steps of: 1. 2 (a) receiving a goal; 3 integrating information that motivates accomplishment of the goal; (b) evaluating the progress toward the goal and provides feedback that further motivates accomplishment of the goal; 4 (c) 5 and 6 adjusting the feedback based on the students progress toward the goal. (d) 1 2. A method for creating a presentation as recited in claim 1, including the step of evaluating the progress based on 2 the number of help sessions the student accesses. 1 1 2 3. A method for creating a presentation as recited in claim 2, including the step of evaluating the progress based on the work completed by the student. A method for creating a presentation as recited in claim 1, including the step of evaluating the progress based on 1 4. 2 the number of changes. The section with the section of the 1 5. A method for creating a presentation as recited in claim 1, including the step of evaluating the progress based on 2 the amount of rework. A method for creating a presentation as recited in claim 1, including the step of evaluating the progress based on 6. 2 the aggregate condition of the work. 7. A method for creating a presentation as recited in claim 1, wherein the user applications comprise: calendar, 1 2 electronic mail, spreadsheet, contact list, word processing, task list, stocks and news. A method for creating a presentation as recited in claim 1, wherein the tone of the feedback is adjusted based on 1 8. 2 characteristics of the student. 9. A method for creating a presentation as recited in claim 1, including the step of adjusting the example based on 1 2 student progress.

10. 1 An apparatus that creates a presentation, comprising; 2 (b) a processor; 3 a memory that stores information under the control of the processor; (c) 4 (d) logic that receives a goal; 5 logic that integrates information that motivates accomplishment of the goal; (e) 6 (f) logic that evaluates the progress toward the goal and provides feedback that further motivates accomplishment of 7 the goal; and 8 (a) logic that adjusts the feedback based on the students progress toward the goal. 1 11. An apparatus that creates a presentation as recited in claim 10, including logic that evaluates the progress based 2 on the number of help sessions the student accesses. 1 2 2 12. An apparatus that creates a presentation as recited in claim 10, including logic that evaluates the progress based on the work completed by the student. 直1 13. An apparatus that creates a presentation as recited in claim 10, including logic that Ĩ 2 ₩ evaluates the progress based on the changes made. T 1 14. An apparatus that creates a presentation as recited in claim 10, including logic that evaluates the progress based on the amount of rework. 15. An apparatus that creates a presentation as recited in claim 10, including logic that evaluates the progress based 2 on the aggregate condition of the work. 1 16. An apparatus that creates a presentation as recited in claim 10, wherein the user applications comprise: calendar, 2 electronic mail, spreadsheet, contact list, word processing, task list, stocks and news. 1 17. An apparatus that creates a presentation as recited in claim 10, wherein the tone of the feedback is adjusted 2 based on characteristics of the student. 1 18. An apparatus that creates a presentation as recited in claim 10, including logic that creates a multimedia 2 presentation as recited in claim 11, including logic that adjusts the example based on student progress.
